# Machine Learning: Assignment 4: Support Vector Machine Classifier

#### **Problem Statement:**

Spam email classification using Support Vector Machine: In this assignment you will use a SVM to classify emails into spam or non-spam categories. And report the classification accuracy for various SVM parameters and kernel functions. You have to submit the report file in pdf format. No programs need to be submitted.

### Data Set Description:

An email is represented by various features like frequency of occurrences of certain keywords, length of capitalized words etc. A data set containing about 4601 instances are available in this link (data folder):

## https://archive.ics.uci.edu/ml/datasets/Spambase

The data format is also described in the above link. You have to randomly pick 70% of the data set as training data and the remaining as test data.

### Assignment Tasks:

In this assignment you can use any SVM package to classify the above data set. You should use one of the following languages: c/C++/Java/Python. You have to study performance of the SVM algorithms. You have to submit a report in pdf format. The report should contain the following sections:

- 1. Methodology: Details of the SVM package used.
- 2. Experimental Results:
- i. You have to use each of the following three kernel functions (a) Linear, (b) Quadratic, (c) RBF.
- ii. For each of the kernels, you have to report training and test set classification accuracy for the best value of generalization constant C. The best C value is the one which provides the best test set accuracy that you have found out by trial of different values of C. Report accuracies in the form of a comparison <u>table</u>, along with the values of C.

### Submission Guidelines:

You should name your report file as <rollnumber\_5.extension> (e.g., 14CS10001\_5.pdf). The submitted report file *should* be in pdf and have the following header comments. No need to submit any program.

# Roll # Name # Assignment number

Please submit the program in moodle by **October 17, 2018 midnight** (hard deadline). Copying from friends/web will lead to strict penalties.
